

# GRADE 9 SCIENCE SURVEY

- Think of a survey question to give to the class.
- Create a data table to record responses to your survey.
- Calculate the number (%) for each response and graph your results.

## Survey Question/Data Table:

| What colour are your eyes? |                 |            |
|----------------------------|-----------------|------------|
| Eye Colour                 | Responses ( ✓ ) | Number (%) |
| Blue                       |                 |            |
| Green                      |                 |            |
| Brown                      |                 |            |
| Other                      |                 |            |

## Graph: (Bar, Pie, Histogram, etc.)
